

Dr. Harvey's Avian Foods

Birds need Variety

Birds need a variety of foods just as they would find in nature. Dr. Harvey's Blends provide a tremendous variety of grains, seeds, fruits, nuts, vegetables and herbs. Birds need variety not just because it is healthier nutritionally but because they get bored with repetition and need to be stimulated both visually and with a variety of textures. Dr. Harvey's Blends are interesting for birds and provide the complete nutrition and variety that companion birds need. In addition to our blends, Dr. Harvey recommends feeding fresh fruits and vegetables daily.

Dr. Harvey is honored by Avian Veterinarians

In 2001 Dr. Harvey's was given an award for **Outstanding Service and Commitment To Advancing And Promoting Avian Medicine and Stewardship** by the Association of Avian Veterinarians.

We Never...

- Use commercial grade ingredients
